

Module 2

Genetic manipulation of *P. falciparum* using the Di-Cre system

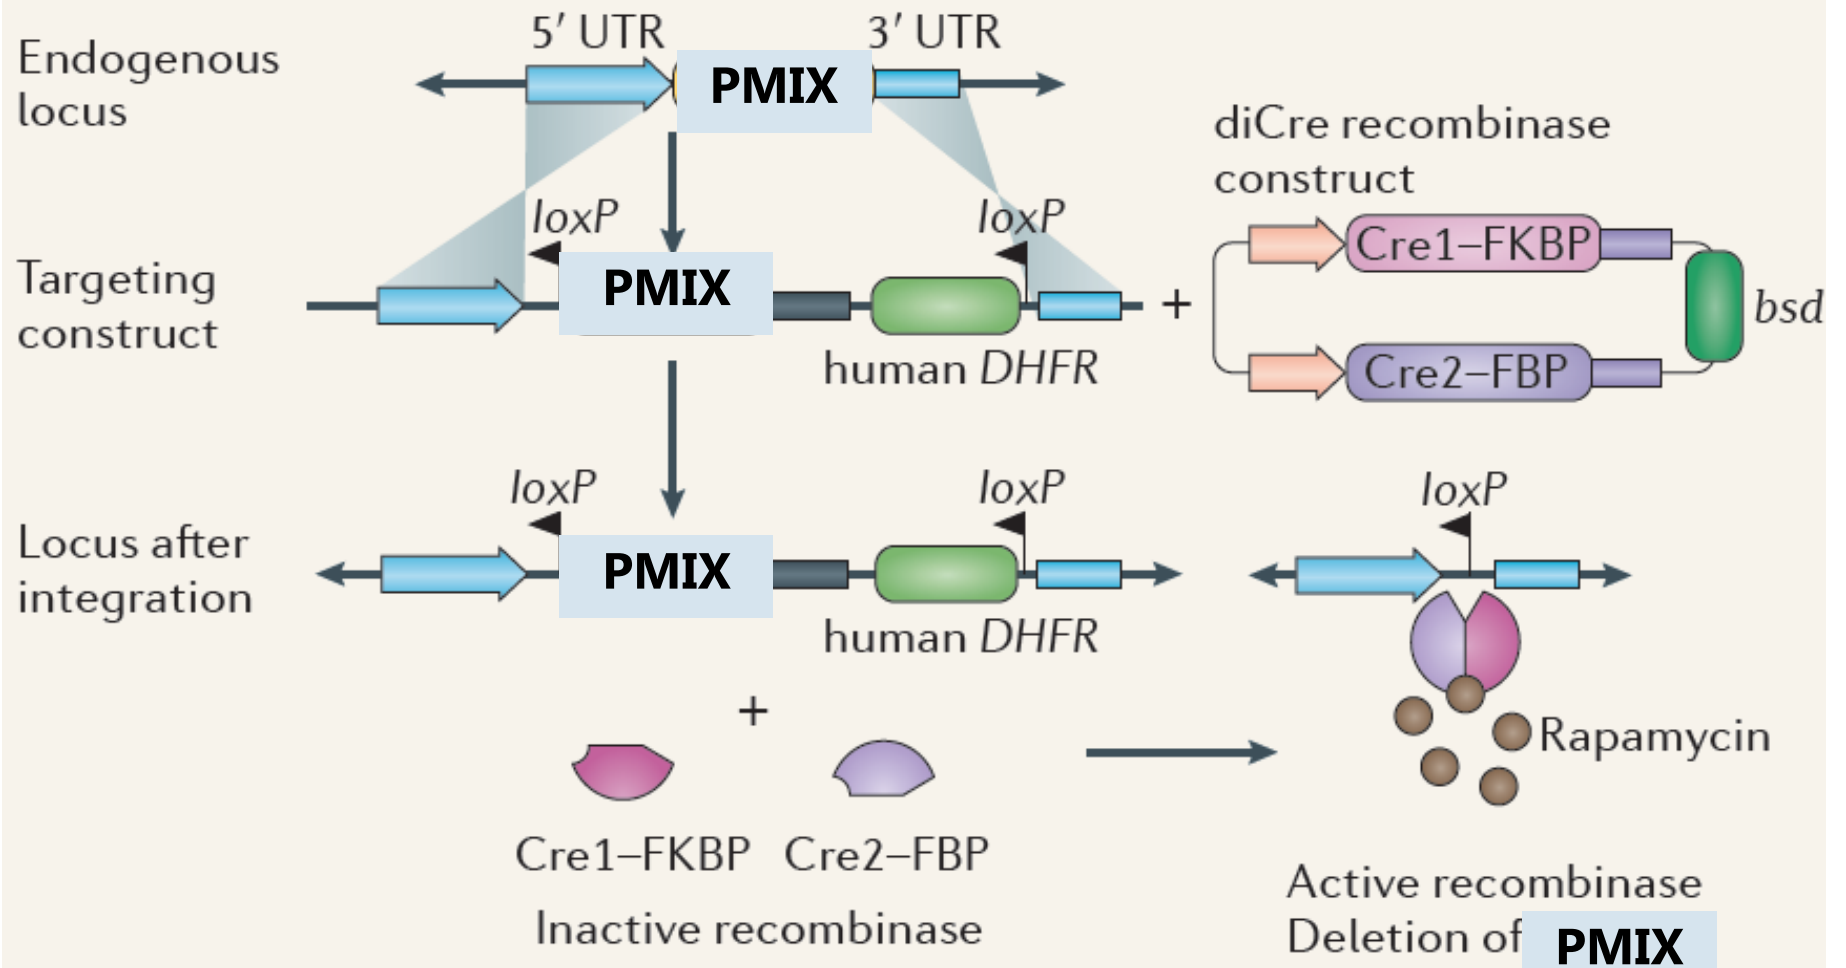

Gertrude and Yana

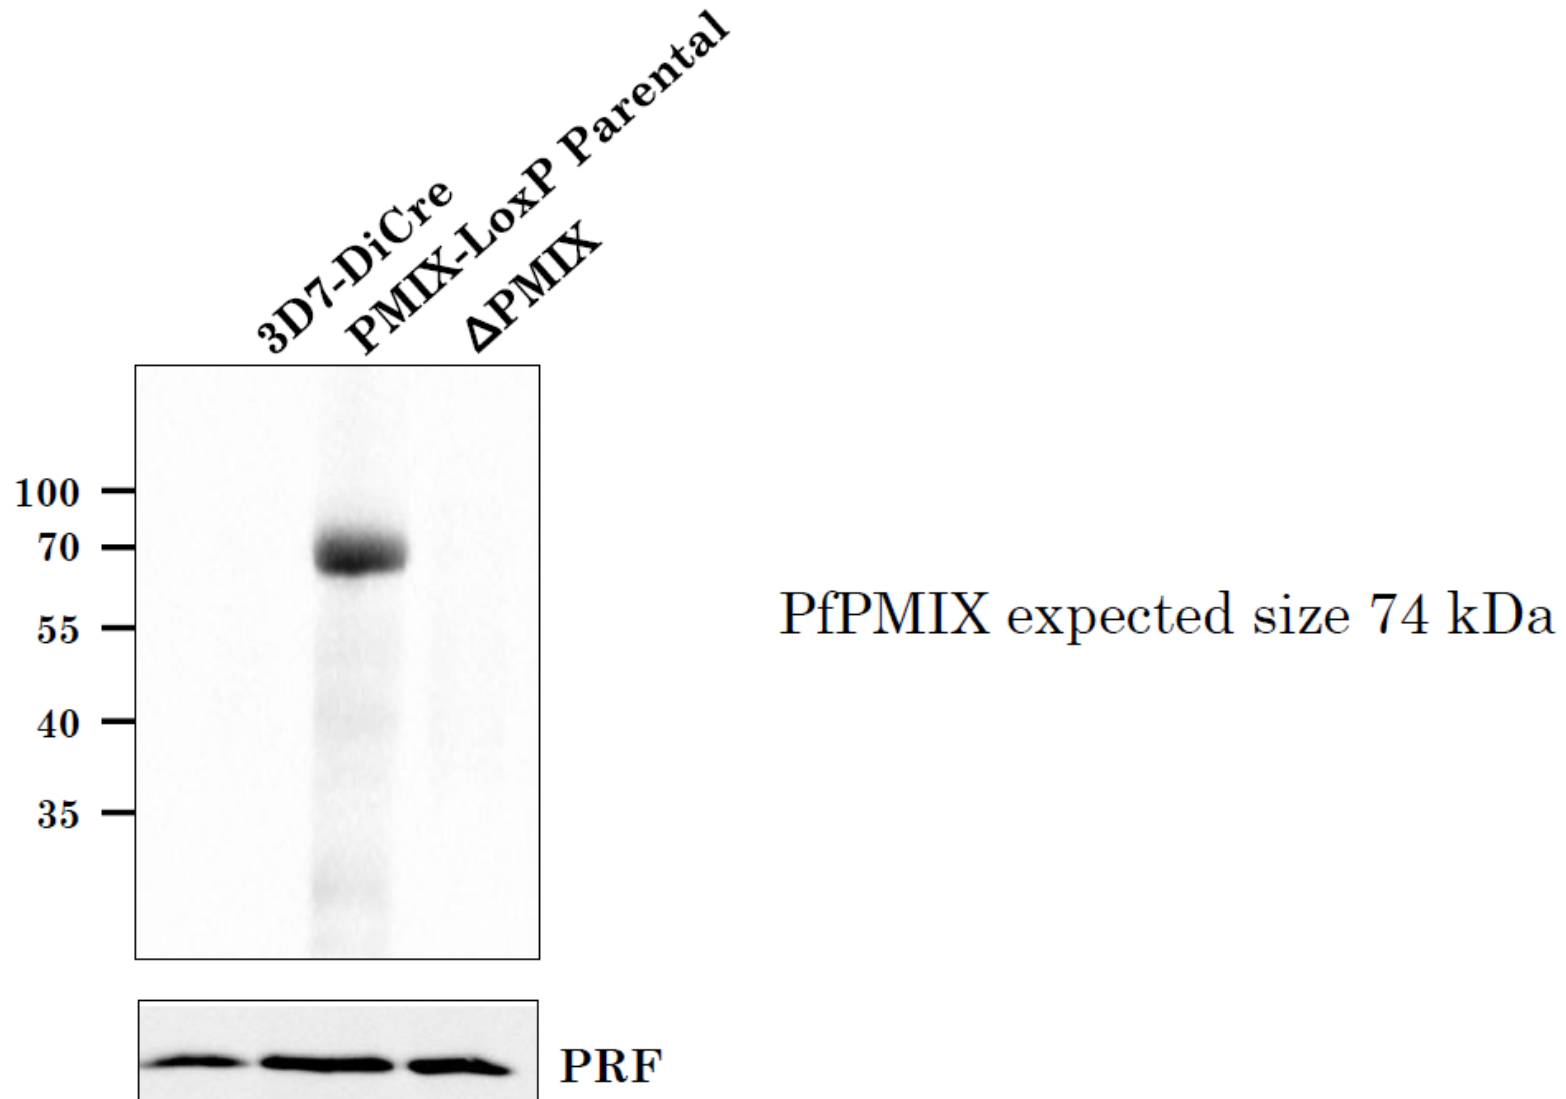

Blood stage of *Plasmodium falciparum*

a Conditional gene deletion

PfPMIX-Ty-Lox expression/excision

Pros and Cons

Pros:

- Complete ablation of gene function if gene is excised
- Flexibility to control gene manipulation

Cons:

- Not reversible
- Costly
- Time needed for excision (4 hours)
- - Multifunctional protein
